学习效果 (Student's Achievement):	
<ol style="list-style-type: none"> <li>All the students can sing the song 《头儿肩膀膝脚趾》(<i>Head shoulder knee and toe</i>) while touching the corresponding body parts.</li> <li>In regard to measure word, the kids still need more practice to accept this new grammar. Through counting family members and the song 《十个印第安小朋友》 <i>Ten little Indian friends</i>, we've already got some basic knowledge about the measure word “个”.</li> <li>All the kids mastered the sentence pattern “I have...” and family members such as elder brother/sister, younger brother/sister.</li> </ol>	
教师点评 (Teachers' Comment):	
<ol style="list-style-type: none"> <li>This is our last month of this semester, so we do more reviews instead of learning new words.</li> <li>In Chinese, the pattern of counting thing is like this way, <b>Numerals</b> + <b>Measure word</b> + <b>Noun</b>. For example, it is easier to describe 一个妹妹 (one sister) in English. So far, we just use measure word to count family members, which could be easily described by the measure word “个”. When we try to count animals or fruit, the measure word would be much more complicated.</li> </ol>	

3、 According to the textbook, we do not require students to write all the word we've learned. We pay more attention on speaking and listening. For those 3rd graders and those who has Cantonese background, I have given them extra writing homework. I will make sure they master what we've learned before learning to new lesson.

下月计划 (Plan For Next Month):

- 1、 Review and learn more body parts.
- 2、 Get familiar with strokes and start to write basic characters in the right order.
- 3、 Practice the grammar structure "I love... and I have..." Learn to say more complicated sentences, like "I love Dad and Mom", "I have one elder brother", etc.
- 4、 Review colors, animals, shapes and fruits.
